

Senior engineer with **18 years** shipping production software, the last **8 building and hardening Web3 protocols**. Contract systems I architected were taken through independent audits by **STATEMIND** (the firm that audits Lido, Curve and Yearn), **QuillAudits** and **storming0x**. I also build AI systems: agents, MCP servers, and LLM-powered security products, live today on the Chrome Web Store and the web.

AUDITED WORK

- 2024-01-17

DEGA ETH ISPO, the first Ethereum ISPO run through Lido: stETH staking, reward accrual, withdraw anytime. Audited by STATEMIND.

[github.com/statemindio/public-audits](#) · [Dega/2024-01-17_Dega_ISPO.pdf](#)
- 2024

\$DEGA token (ERC-20) with TypeScript deploy pipeline. Audited independently by QuillAudits and storming0x.

[github.com/DEGAorg/ERC20](#) · [/audit](#)
- 2024-07-20

DEGA TGE claim, multi-chain claims via EIP-712 typed signatures with cross-chain replay protection. OpenZeppelin v5, Hardhat + Foundry. Audited by storming0x.

EXPERIENCE

- Senior Software Engineer, Independent** · Self-employed, remote

Independent contract engineering for US clients. Web3 security and architecture: the DEGA audited contracts above, game worlds operated by autonomous AI agents, a medical claim system on the Midnight blockchain (Compact, pre-mainnet through mainnet), RWA tokenization with Firepan, and MCP agent tooling that lets AI agents hold wallets and transact.

Jun 2023 · present
- Senior Software Engineer, Contract** · MILL5

Quality-focused engineering for a US-based regulated medical-device product: requirement and test-case reviews, defect triage, requirements traceability, release readiness in a distributed team.

Nov 2023 · present
- Blockchain Developer** · FIWORK, full-time remote

Solidity contract architecture, cryptographic primitive design, dApp integration (viem/ethers), audit preparation, and testing infrastructure for Web3 products.

Jun 2021 · Jun 2023
- Senior Software Developer** · MILL5, full-time

Full-stack TypeScript, Node.js, .NET and distributed systems for US enterprise clients.

Feb 2020 · Jun 2021
- Senior Frontend Developer** · PSL Corp, now Perficient

React and TypeScript architecture for financial services, healthcare and SaaS clients, including Xtiva and SEON (Safe Fleet).

Feb 2019 · Feb 2020
- Frontend & Blockchain Developer** · Blocksize

eFIN DEX for TokenPay: non-custodial exchange with atomic swaps (BTC/LTC/ETH) routed over Tor. Wallet UX, smart-contract integration, cryptographic primitives. First Web3 role.

Sep 2018 · Feb 2019
- Earlier roles** · Globant (×2), Intertec, PraTech, Intergrupo, FoundationLab, PSL, Ecoinfo

Full-stack, .NET and SharePoint engineering for Wells Fargo, Electronic Arts, the Inter-American Development Bank, Deloitte, Bancolombia, Suramericana, Avianca, Ecopetrol, and Nomis Solutions.

2009 · 2018

SECURITY & AI PRODUCTS (NOCTIS)

- Argus**, AI transaction firewall for crypto wallets. [Chrome Web Store](#)

Argus Lens, static supply-chain malware scanner.

[lens.noctis.biz](#)

spectr-ai, AI smart contract auditor (Solidity + Vyper).
